

Idaho DCRA Implementation Update – October 2024

Since submitting the Idaho DCRA Implementation Plan in 2023, the Idaho Statistical Analysis Center (ISAC) has made one minor change to the DCRA program's data collection process. Beginning with the 3rd quarter of federal fiscal year (FFY) 2023, the ISAC Director has sent quarterly reporting email reminders to all 120 agencies in Idaho required to report DCRA data, rather than having some of those reminders come from the state's Uniform Crime Reporting (UCR) program. After making that change, our quarterly response rate climbed to an average of 57% over the next five (5) quarters (for comparison, in the 2nd quarter of FFY 2023, our response rate was 19%).

Overcoming Challenges Section Update: The special condition requiring JAG subgrantees to submit DCRA forms, including those confirming zero deaths, will be added to the 2023 JAG Special Conditions, which will be attached to subgrantee projects receiving FFY 2023 (and later) JAG funding.
