Subject: ISP Forensic Services Updated Scheduling Reporting for Controlled Substances

Date:

March 03, 2009

After consultation with the Idaho Attorney General's Office and Idaho Board of Pharmacy, the Idaho State Police Forensic Services Laboratories will begin issuing reports using updated scheduling for some controlled substances.

The reason for the updated schedule is because discrepancies were discovered by the laboratory between Idaho's published list of substances controlled by the State of Idaho and that of the current Federal register. <u>Idaho code section 37-2702 (d) states:</u>

"If any substance is designated, rescheduled, or deleted as a controlled substance under federal law and notice thereof is given to the board, the board shall similarly control the substance under this act after the expiration of thirty (30) days from publication in the Federal Register of a final order designating a substance as a controlled substance or rescheduling or deleting a substance, unless within that thirty (30) day period, the board objects to inclusion, rescheduling, or deletion."

The Federal register has approximately sixty four (64) additional compounds listed, several of which we have seen through the course of our casework. One we are seeing more frequently is 1-benzylpiperazine. This situation has lead to confusion between our lab personnel, detectives, and the various prosecutors as to whether or not a substance is controlled and thus can be prosecuted through the Idaho state court system. Idaho code dictates that the Idaho Board of Pharmacy has (30) days to object to the inclusion, rescheduling, or deletion of a substance from the register.

ISP Forensic Services has prepared and attached an appendix of sixty four (64) substances that are Federally scheduled, but not on the current Idaho State schedules. In addition, the DEA now lists flunitrazepam (rohypnol) as a schedule four compound. It is the opinion of the Idaho Attorney General's Office, the Idaho Board of Pharmacy, and the ISP Forensic Services Laboratories that because the Idaho Board of Pharmacy has not objected to these changes to the Federal schedule, ISP Forensic Services should follow the updated Federal list when we schedule these substances on our reports. Reporting of this updated scheduling will be effective on all reports issued on or after March 30th 2009.

Thank you for your attention to this matter. If you have any questions or comments, please contact the ISP Forensic Services Quality Manager, Matthew Gamette, at 208-884-7217.
