<u>LAB_CASE</u>	<u>ITEM</u>	<u>TASK_ID</u>	<u>DESCRIPTION</u>
C2017-2279	2	105104	AM 2 Urine Toxi B
M2017-5370	3	105105	AM 2 Urine Toxi B

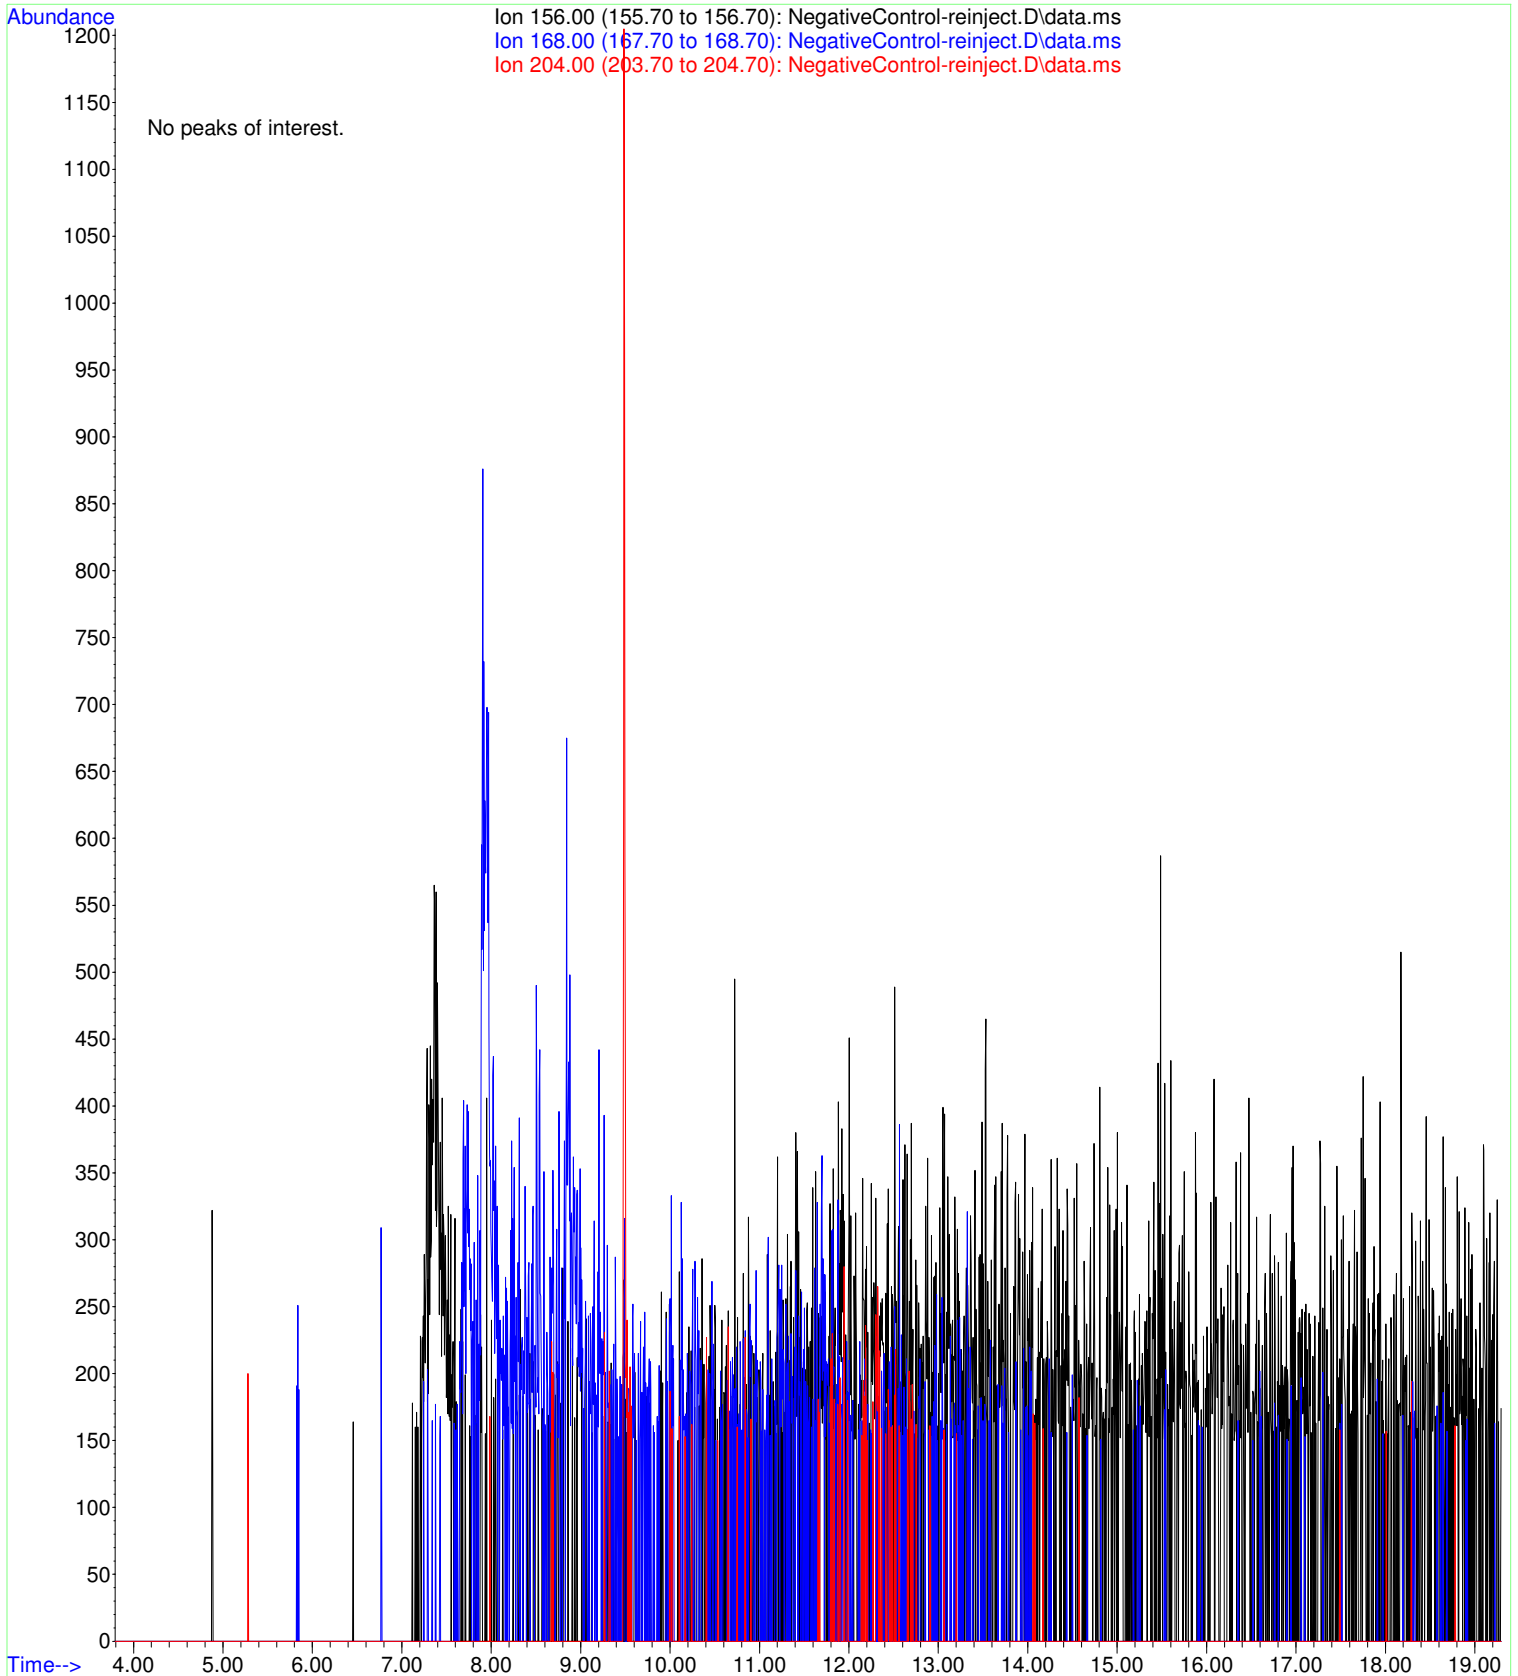

The extraction was performed on 1-12-18. The negative and positive controls ran and then an error occurred on the instrument that stopped the run. The negative and positive control were reinjected on 1-13-18 along with the case samples. I reinjected all of the samples on the 14th as I was hoping the phenobarbital might look a little better in the reinject. The phenobarbital looked slightly better but one of the case samples failed to reinject so I used the data collected on the 13th and did not use the data from the 12th or 14th for anything.
