Idaho State Police
A Report to Our Citizens
Fiscal Year 2018: July 1, 2017--June 30, 2018

Agency Overview

Idaho State Police (ISP) fulfills its mission with the variety of services entrusted to our agency. Our primary programs consist of Patrol, Investigations, Alcohol Beverage Control (provides licensing, education, and enforcement services for over 5,000 liquor licenses), Police Services (Forensics, Criminal Justice Information Systems, Bureau of Criminal Identification), Management Services, and Brands, Racing, and Peace Officer Standards and Training (POST), divisions within ISP.

Additionally, ISP maintains the state’s criminal history records, the statewide Public Safety and Security Information System, and backup data for other agencies.

The Director of ISP, Colonel Kedrick R. Wills, appointed by the Governor and confirmed by the Senate, oversees the operations throughout the state from the headquarters complex located in Meridian, which includes a forensics laboratory and the facilities for the Peace Officer Standards and Training Academy.

Our Mission
Providing public safety across the State of Idaho through law enforcement excellence
### Customer-Focused Performance Measures

**Idaho State Police Troopers** who patrol our state are now equipped with and trained on electroshock weapons, or Tasers, as of early 2018.

It is generally a less-than-lethal alternative to deadly force weapons and has been shown to enhance the effectiveness of restraint while minimizing harm, which is considered to be a superior alternative in many cases.

In August, ISP Regional Communications Centers welcomed a new communications era with an upgraded 911 system installation. Motorola installed equipment and trained our dispatchers on the new system, which will soon allow them to automatically locate cell phone callers who dial 911. Previously, when a local 911 call center transferred a call to one of our two communication centers, the caller’s location could not be easily discerned, which has led to problems. Now, the data is seamlessly transferred to ISP using technology found in modern cell phones.

Idaho State Police receives the majority of revenue from dedicated funding sources. These sources include user fees or taxes that are collected to finance a specific service or project. Examples of dedicated funds of ISP are the fuel tax and monies collected from vehicle registration for patrol.

General funds are monies collected from taxes and fees imposed by the state, such as individual and corporate tax.

Federal funds received by ISP include those used directly for our programs, or passed through to other state and local governments for criminal justice activities.

Financial information is prepared according to Generally Accepted Accounting Principles (GAAP) Annual Financial Report can be viewed on the State Controller’s Office website at www.sco.idaho.gov.
ISP Troopers patrol 4,930 miles of roadways. Idaho Department of Transportation estimates the number of miles driven on State and Federal roadways is 17.15 billion miles in 2017. Idaho population and licensed drivers show a steady increase over the five year span as well. Requests for service from dispatch average 225,000 calls per year for service, which equates to 1,142 calls per Trooper. As the population and driver counts increase the need to have highly qualified Troopers increases. ISP recruit academy is held once a year, and on occasion will be held twice. We encourage all those looking for a career in law enforcement to consider ISP.

According to the U.S. Census Bureau, Idaho was the nation’s fastest-growing state last year, with a population increase of 2.2% from July 2016 to July 2017. We now have some 1.7 million people in the Gem State, and there’s no sign of a slowdown.

The Idaho State Police is working to keep up with this growth by increasing our own workforce. Since 2010, we’ve added additional detectives and patrol troopers to our ranks for a total of 311 commissioned personnel. We’re working to keep up in other areas for which we’re responsible, for example, with the Brand Inspection Division. With the human population increasing, our brand inspectors are busier than ever because that growth means more food is being produced in our state and that includes livestock products headed to our dinner tables. Last year, our Brands team inspected over 2 million head of livestock, a task which will soon be made easier with technology. Inspectors will use hand-held computers to identify livestock, record brands and trace potential carriers of livestock-borne diseases. This will make current processes faster and allow inspectors to quickly access a central repository database, all in the name of increasing efficiency, keeping our livestock safe and keeping up with growth. The anticipated go-live date for this technology is April 5, 2019.
